

ENERGY EFFICIENT SOLUTION THAT SAVE YOU MONEY

Reduce Your Parking Lot Lighting Cost 60-70% with LED lighting

Existing 400 watt Metal Halide
\$220.66 annually

New 150 watt LED
\$72.27 annually

Do you really know what you are spending to illuminate your exterior spaces? A 400 watt Metal Halide pole light fixture can cost you as much as \$260.00 each annually, a 1,000 watt approximately \$614.00 each. These energy hogs are burning an average of 12 hours each night and typically range from 250-1000 watts.

Technology now exists to cut the consumption of these fixtures by 60% or more, from wall to pole mounted fixtures they are costing you each month to operate. Replace these and realize immediate savings with LED lighting. So, what are the benefits? There are many!

- Reduce maintenance cost with long life LED fixtures outlasting existing lamps 5:1.
- Superior light quality which give off a daylight appearance.
- Instant on Technology allow these fixtures to produce light immediately, no waiting.
- Ideal for high or hard to reach places due to its long life expectancy.
- Up to \$100.00 per fixture utility company rebate.
